

People have damaged the earth's meridians so they are blinding us to the planet's & humanity's needs

I'm a Feng Shui Master, have done meridian restoration in the US and seek a grant to work worldwide. The results will be amazing! Humanity will be more peaceful, saner and care about the earth's future.

"Start by doing what's necessary; then do what's possible; and suddenly you are doing the impossible." Saint Francis of Assisi

Cover Art

A gap in a meridian affects the whole planet. The map is an approximation of current meridians. I will restore where restoration is possible and in other places slightly move some.

Got Gaps?

This project is key to the world's evolution and survival. It can't become a 501(c)3 so it falls between gaps of foundation grants. The world and I would be thankful if you could help in a small or large way. *Restoring the earth's meridians will lead to proper human behavior so we can turn global warming and other issues around is critical.*

Grant Proposal to Restore the Earth's Meridians and Humanity's Sanity

Earth's 12 energy meridians affect everything on the planet. Just like our 12 meridians they are necessary for survival. Many meridians have been disturbed or removed, especially by earth moving projects. This is causing unwise human decisions, some of which are bringing further harm to the meridians. Restoring them will turn the downward spiral around making it easier to put out political, climate and other fires which are so prevalent. My life is hyper focused on restoring the planet's meridians to help bring peace and sanity again.

☞ **A Bit About Me**

Since I was knee high to a gopher I've led a life different than most people, with chi, personal evolution, innovation and caring for the earth converging. In fifth grade I was voted the most improved in the class, a foreshadowing of adult life when others told me I evolved more than anyone they knew. I wasn't just evolving for my benefit. Humanity's and the earth's benefit are intermingled. In 1970 in high school a group of us organized recycling when hardly anyone was aware it was possible or needed.

I did service for many groups while living in the Garberville California area for 20 years. I include this info and more in the grant to share where I come from in life. Most people never find these things out about me. They're certainly not secrets. I just am not inclined to brag.

- We started a community FM radio station on a shoestring and I became the Chief Engineer, a programmer airing viewpoints and music not often heard and a member of the Program Selection and Review Committee which selected programmers and helped them improve. I enjoyed anchoring live remote broadcasts to bring community meetings and events to those who couldn't attend.
- The town's banks weren't making loans to credit worthy community members who lacked a formal credit rating so we formed a community credit union and I was elected VP. It was so successful the Bank of America left town a few years later.
- Volunteering on a telephone crisis line
- I had always been appalled at how some men were violent to their partners so I received training to lead a Men's Alternatives to Violence Group. It was rewarding to see men learn about taking time outs and other skills instead of doing harm.
- In my desire to share skills I've taught electronics, stage craft, literacy and more.

My life has progressed from one modality to another, looking for better, more efficient ways to evolve, help others and the world and trying to include fun along the way!

☞ **My Introduction to Feng Shui**

You likely have heard of feng shui, the ancient discipline of harmonizing chi so people lead better lives. I discovered it out of necessity for a company I previously started. It was challenging to implement but the results were amazing, beyond anything I'd experienced in other life or business improvement systems. I'd been an electronics technician and my technically inclined mind took repeated experiences to be convinced. Once I experienced it enough I switched careers and was trained by three students of a Feng Shui Master to be a practitioner and offer the world a traditional form of this most powerful life changing system.

☞ Understanding Chi Through Analogies

Chi is real but invisible so it's hard to understand. To those unfamiliar with electricity and the modern world, holding a battery, light bulb and a few wires and saying these objects will light up a room would seem unbelievable. To see it happen would be like magic. If they were open minded, with explanation it would start to make sense and they might even want it as part of their everyday life.

When acupuncture was becoming popular in the US some doctors set out to find meridians by studying a cadaver. Of course they didn't find meridians as they don't need physical pathways, plus meridians cease flowing at death. So the doctors decided acupuncture was a hoax. When the story made the rounds of acupuncturists they found it sad though funny as you might. Over time instruments were developed which could sense subtle energy and prove acupuncture meridians exist. Now many HMO's embrace acupuncture because for many conditions it works wonders. Improving chi is a powerful modality, yet knowledge of the earth's meridians is in its infancy in the west.

☞ A Bit About Feng Shui Which Improves Meridians in Buildings

If you live or work in a rectangular building, it has its nine feng shui areas. But if a corner was missing, living in the building you will be missing the corresponding part of your life force energy. You would find it hard to have good finances, relationships or another area, depending on which corner was missing. Missing two, three or four corners and troubles increase geometrically. Other aspects are important such as doorways, windows, roof angles, color... the list fills books with situations whose chi affects us for better or worse. Modern construction rarely takes these into account so humanity walks through life with virtually everyone challenged, yet thinking this is normal. It isn't, it's just so common we take inordinate difficulties as the way life has to be.

☞ A Better Way

Once I became a practitioner I saw my clients struggle with esoteric standard feng shui. I have an inquiring, inventive mind so I developed an easier way, Life Chi Feng Shui. Through focused meditation I energize natural crystals, creating implements to quickly do thousands of corrections buildings need. It's automatic, fast and effective. Clients no longer needed numerous "cures" around their home or business to do chi corrections.

For example, one home I feng shui'ed had conflicting roof angles. That's when parts of the roof meet at odd angles to each other which cause conflict in the occupants. With feng shui their arguments stopped in 20 minutes! In another home the children were problematic... the son was obstinate including not eating vegetables and the teenage daughter was aloof. They had a problem in the feng shui children area. Within weeks the son was not only eating his veggies but also requesting raw broccoli. The daughter became part of the family again and even gave them hugs. Their parents were amazed. Clear beautiful chi was the key. I long for that all over the earth. Chi is as real as anything else on earth and allows appropriate thought and action. Results can be dramatic or subtle but everyone gets what they need including a more peaceful life.

"You are not here merely to make a living. You are here in order to enable the world to live more amply, with greater vision, with a finer spirit of hope and achievement." President Woodrow Wilson

☞ The Earth's Energy Meridians are Far More Powerful

Energy at special rock formations which control many of the meridians can be so powerful it can be felt. The sensation is like contacting electricity. I couldn't even touch one as a few inches away it felt like 120 volts.

Two Elements of the Earth's Communication System

Rare spiral pointer rock. Most pointer rocks send chi straight up or at the north star and emit enough chi to feel a tingling similar to electricity above the point.

Rare double chi receiving dish. DishTV offerings pale compared to what these pick up.

☞ Global Scale Feng Shui

Quality feng shui fills a building's missing corners and other problem areas with chi. The meridian restoration will fill missing areas of the earth's chi which have been removed by roads and other human caused problems.

Meridian restoration (correcting the earth's chi) will turn everything around. With the earth's meridians being troubled or in some cases missing, we suffer and are doing harm to the earth. Humanity will behave much more rationally when the earth's chi is flowing well.

"The earth does not belong to man; man belongs to the earth. This we know. Whatever befalls the earth befalls the sons of the earth. Man does not weave this web of life. He is merely a strand of it. Whatever he does to the web, he does to himself." Chief Seattle

☞ Bringing Fire Into Balance

I will also be working to balance the five sacred feng shui elements, especially fire. One aspect of earth's problems is that there is an over abundance of the fire element. This is from fossil fuels and nuclear energy that have been obtained by depleting the earth element, overheating it which causes anger. There are esoteric ways to bring balance.

☞ NASA

I mention NASA because it demonstrates what poor chi can do and one way it can be sensed. After the second shuttle disaster I did inquiry and meditation, wondering if feng shui could have caused the problems. The answer was yes so I researched NASA's web site. Their headquarters' footprint was the most irregular shape I have seen in a commercial building. The engineering, main office and mission control buildings also had problematic shapes. Then I read the Accident Investigation Report from the Apollo 1 mission when three astronauts died in a fire during a launch rehearsal. The report cited the same underlying problems as with the shuttle missions: schedule deadlines needing to be met despite engineers' warnings, budget constraints and mismanagement from the top levels. The specific engineering problem which caused the Apollo 1 fire (which never made it into the popular press) was leaks in the cooling system which used highly flammable refrigerant. Engineers warned that despite their best efforts to repair the leaks, because some were behind electronic equipment which could not be removed, adequate repairs couldn't be guaranteed. Combined with an enriched oxygen atmosphere

and a spark it spelled disaster. I sent letters to management and the Accident Investigation Team offering help but they didn't respond.

☞ **The World Trade Center**

9/11 woke me up. After the initial shock wore off I meditated and did inquiry. I sensed the site had been a powerful sacred earth energy site and had been a problem for commerce since the earliest colonial days. Great, I thought. How am I ever going to prove this? (It is nice occasionally to get confirmation of intuition.) I remembered when a man drove his explosive laden van into the basement. But the rest seemed lost to history. A few years later I awoke compelled to Google "history of the world trade center site." The top result was an article in The New Yorker by that exact title. It detailed how there had been a warehouse fire and a major labor riot on the site. The article went further back. In colonial days a Dutch West Indies Trading Company ship burned and sank on the site. It should be noted that some of Manhattan was land filled both to dump trash and create more land. Charred remains of the ship including distinctive elements which identified it as a Dutch West Indies ship were discovered during the WTC foundation excavation. Intuition can be amazing.

"Societies raise their grandest monuments to what their cultures value most highly." Michael Mandelbaum - Director of the American Foreign Policy program at the Johns Hopkins University, School of Advanced International Studies, speaking about the WTC.

The WTC was all about commerce and for hundreds of years the energy of the site had been kicking commerce out, but no one sensed chi or learned from history so we made increasingly worse mistakes. I wrestled with what to do. I didn't write anyone as I had grown tired of jousting at windmills. I need to focus my energy where it will do real good. The site needs serious help. It is on my list, though near the end as the rest of the earth's overall chi has to be in better shape before I can help the WTC's situation.

☞ **The Sites**

I've restored energy sites in the US over the past 15 years at my expense. There are 50 critical sites in over 25 countries I will visit in two years, some of them twice. Two of the sites:

The Door to Hell

A big rock in Jerusalem which needs to shift

☞ **The Door to Hell**

In the desert in Turkmenistan is an unusual 100 meter wide hole. It was created in 1971 when the Soviets were drilling for natural gas, hit a massive gas cavern (eureka!) causing the ground to collapse and the drilling rig to fall in (oopskie;-) The crater has been burning ever since. It's a minor tourist attraction with tradition being BYOM (bring your own marshmallows).

To a casual observer this is a big burning hole in the middle of nowhere. Meditating on it I realized the cavern had been a resonant chamber for the earth's chi. As it isn't possible to do physical restoration, my plan is to use a slingshot to place specially selected and energized crystals in the hole in a geometric pattern to restore as much of its original chi as possible. There are additional places to work with in the

the Soviet region. I sensed the area was peaceful long ago and found the Russian word *mir* translates both as peace and earth. I am determined the words be joined as they rightfully should be.

🦋 **The Big Rock in Jerusalem**

What do you get when you cross three of the world's religions with a rock? I wish it was a joke. It's the most contested place on earth and the cause of so much war.

It's called *Even haShetiya* in Hebrew which translates as The Foundation Stone. The Jewish tradition sees it as the place creation started, the altar in the ancient Temple, the junction of heaven and earth and the holiest of holy places.

In Arabic it's called *El Sakhr* (The Rock), the place angels visited 2,000 years before the creation of Adam, where the prophet Mohamed ascended to heaven on a stairway of light and the place where *Israfil*, the angel of the trumpet, will sound his horn on Resurrection Day.

Around 690 AD the Muslim Dome of the Rock was constructed over the rock. When Christian Crusaders conquered the area in 1099 they converted the dome into a church they named *Templum Domini* (Temple of The Lord). Many churches in Europe incorporate aspects of the building. The Crusaders called the cave under the Rock the Holy of Holies and revered it as the site of the annunciation of John the Baptist.

"Any peace effort that does not tackle the root causes of the crisis will do little more than set the stage for the next cycle of violence." Ban Ki-Moon, Secretary General of the United Nations on one of the many Israeli-Arab cease-fire agreements.

What's in a name? *Israel* translates from Hebrew as "s/he who wrestles with God." Quite a wrestling match it has been!

🦋 **What I plan to do**

I will spend time near the Sea of Galilee where Jesus lived many years to connect with his energy and receive guidance for the work. Then I'll meditate at this rock, connect with religious leaders and try to get permission to bury energized crystals for peace nearby. Egypt and other points in the mid-east are calling. 6,000 years of poor chi need to shift.

Religions and Governments Imitate Sacred Sites

Weathered Sacred Site

Christian Church

Dome of the Rock

US Capitol Dome

Others include the Taj Mahal, Pantheon, many stupas, mosques, churches and government buildings. One has to wonder if the sacred site originally had a slender feature on top.

"When the missionaries came to Africa they had the Bible and we had the land. They said 'Let us pray.' We closed our eyes. When we opened them we had the Bible and they had the land." Desmond Tutu

🦅 Iceland

The US has had financial meltdowns and I did inquiry to find out what was behind them. At first I suspected the Federal Reserve, Wall Street, The Treasury and Fort Knox but I didn't see major problems with them or other US buildings. Then in 2008 banking in Iceland bit the dust. Scandinavian people are some of the kindest and sanest on earth I thought, what could have gone wrong there? I intuited that an energy formation in Iceland needed help. It relates to things of true value and how we treat them. That formation has been affecting us in increasing ways for a long time. Irrational desire for money and many financial meltdowns have been the result of the earth's human caused energy problems.

🦅 Crestone

I didn't hear of Crestone Colorado until I moved to Boulder. You likely never have heard of Crestone either. It's a tiny town in the middle of nowhere while still being in Colorado. The best known nearby attraction is Sand Dunes National Park which may be our least known National Park. Twice while living in Boulder people mentioned Crestone. I had no idea what was there but intuited I had to move. In Crestone I met John Milton and knew he was the reason I was drawn there. Amory Lovins, John and others originally purchased acreage in Crestone to build solar homes using the abundant rocks on the property. John, a Taoist Master, camped there to connect with the land. In meditation the rocks showed him the earth's energy system and sacred rocks which control the earth's meridians. John had to convince Amory and others, who were the financial backers, this was not a place to build solar homes, but instead had to be preserved. It is now a sacred land trust. John has been leading high energy vision quests using the meditation seats plus teaching this system of meridians ever since.

🦅 Aboriginal Connection to the Wisdom

Around an evening fire Aboriginal elders can recite their lineage 50 generations back. John brought some of these planet historians to the Crestone site. They recognized what he was sharing and said "Ah, so white brother knows of this too." What John and I have received from meditation is amazing. It's also very nice to know this meridian system is connected to an ancient honored lineage. I plan to study with Aborigines on the journey.

Machu Picchu's sacred
Intihuatana Stone

Pyramid mountain behind V valley connects
people to earth and sky energy; are basis of
the Jewish Star and Hindu Shatkona

Happy people
belong here

🦅 The Path Less Traveled

While John and his other advanced students use sacred sites and their meditation seats for vision quests to help people evolve, I am on the path less traveled. This is typical for my life, even amongst free thinking alternative groups. Funding from within the group is impossible as they are purchasing (with great difficulty) land adjacent to the original land trust.

"I've come to believe that each of us has a personal calling that's as unique as a fingerprint – and that the best way to succeed is to discover what you love and then find a way to offer it to others in the form of service, working hard, and also allowing the energy of the universe to lead you." Oprah

☞ No Duplication of Work

This is an ancient oral tradition. There are few people other than Aborigines and John Milton's students who know this meridian system. No one is restoring meridian formations. Common ley lines are better known but a different energy system.

☞ A quick flashback

On family vacation when I was young we visited Flagstaff Arizona. I loved it. Unbeknown to me at the time, this was a foreshadowing. This and so much of my life has been predestined at a level I continue to be in awe at.

☞ Returning to the Energy Story of My Life

Once I learned the meridians from John I knew I needed to move to Flagstaff, though I wasn't sure why. While hiking in Northern Arizona I discovered a large critical meridian formation and meditated there. It had been disturbed from its original arrangement. I sensed what was needed and carefully, meditating and checking in, day after day, moved the rocks to their original positions restoring their chi. Then meditating with them was incredible and my desire to be in Flagstaff diminished. At first I thought my restoration work was done, but it was just beginning. The world was beckoning.

☞ Why We Have a Problem

Aborigines and other ancient cultures recognized the importance of earth energy lines and didn't disturb them. For the most part all was well until humanity started building and moving large amounts of earth and rock. As most of the earth's major energy flows are controlled by special rock formations, disturbing them has over time disastrously decreased earth's energy flow. With less chi, humanity has less intelligence and cares less about the earth, destroying more of it in a degenerative spiral which has to be turned around.

☞ The Restoration Process

The process is site specific depending on various factors. I will use techniques such as:

- Moving ordinary rocks to create sacred formations.
- Having rock workers carve what used to be on a site. That information will come from local wisdom and my intuition.
- When all else is impossible, I will bury energized crystals to do the chi adjustments. Part of both classical and modern feng shui is using special implements which have been empowered in sacred ways to adjust chi.
- Revisiting some sites to do fine tuning.

☞ A Partial List of Sacred Sites to Restore

Germany (2)	India (2)	Italy (2)	Egypt (2)	China (2)	Russia (2)
Israel (2)	Mongolia	Sudan	Mauritania	South Africa	Iraq
Iceland	Turkmenistan	Hiroshima	Easter Island	New Zealand	World Trade Center
Austria	Australia	Madagascar	North Pole	South Pole	Indonesia
Democratic Republic of the Congo			Egypt		

☞ Locating the Sites

Looking back, from childhood my life was intensely though unconsciously focused on the meridians. I found the formation in Northern Arizona not knowing I was meant to restore it. While unconscious intuition worked previously, now I use intent, focused intuition and other methods to guide me to the right places. For example, in a dream I saw a building close to a formation New Zealand and the rural location so it should be easy to find. I meditated on a map of Iceland and sensed the location of its formation.

"It always seems impossible until it's done." Nelson Mandela

Dolphin Rock is one of the main ancient energy points in the Crestone Colorado Land Trust

The Navajo Twins formation with great relationship chi in southern Utah

Let no one say the past is dead, the past is all about us and within." Oodgeroo of the tribe Noonuccal

✂ **Traveling Assistance**

I am healthy and strong but have shifted my mental focus to become more able to work with the chi, while bureaucratic and some other travel details would be a burden. Especially troublesome is the idea of driving on the left side of the road while looking for sites in some countries. I have three capable, intuitive people picked out as likely candidates. I've told them of the project and they are enthused, but I haven't told them they may accompany me as I don't have a time frame till funding arrives.

✂ **Some Linked Items**

Most people who have heard of feng shui think it's a way to increase abundance. Yet abundance is just one of feng shui's nine areas. Everyone has challenges, including those practicing feng shui such as myself. With that in mind I want to address order, feng shui and finances.

The Power of Order and What About All the Fires?

Common practice holds that putting out fires is the way to bring about change: Elect a better politician, stop a war, prevent global warming... the list goes on. Feng shui and chi practices see it differently. For example, to bring about change, feng shui corrections have an order: if at all possible you want to start with the largest area which is typically the one most needing help and work your way to the lesser items, triage like. Some people feng shui their desk which is nice, but how about the room, the house or the lot.

Life Chi Feng Shui

The feng shui form I developed gives my clients good to incredible results yet averages only two sales per month. I've been asking myself "why haven't sales taken off?" and sometimes folks tell me "maybe you need some feng shui." I now realize I need to feng shui the earth as the largest element, then Life Chi will take off and my finances will flow. Then my goal is to feng shui a huge number of homes worldwide by 2025. First though, I need to set the foundation by respecting order and doing meridian restoration. We are each connected to at least one sacred rock formation. If it is off, our life suffers. There are two I am connected to which I will correct on my journey.

My Financial Situation

Over 15 years I've traveled much of the US in my 300,000 mile car restoring sites and doing service. I am a peace pilgrim and have been living on \$200-800 a month, often doing work trades for rent. My needs have been few and I've been happy with little.

"Polaroid by its nature makes you frugal. You walk around with maybe two packs of film in your pocket. You have 20 shots, so each shot is a world." Patti Smith

🦋 The Project's Budget

It's hard to pin down exact numbers for a two year endeavor like this but I feel these figures are close and frugal. Full or partial funding is welcome as at least four circumnavigations are needed. \$35,000 would get the project rolling, \$100,000 or full funding would be amazing. More would go to purchase and protect sites. Perhaps you know someone who would like to join you in funding this project?

Preparatory and onetime expenses for two people including medical check-ups, gear, immunizations, international cell phones, passports, guide books, retain an attorney for just in case, expenses while preparing	\$15,000
Daily and monthly expenses including visas, lodging, meals, car rental, other ground transportation, travel insurance, mail scanning and forwarding service, VPN, phone, plus the unexpected (730 days @ \$300 per day total for two people)	219,000
Expeditions to North and South Pole energy points - primarily specialized air Transportation	150,000
All other air transportation	300,000
Hiring specialized help - carving missing rocks	250,000
Contract support staff in the US	20,000
Total	<hr/> \$954,000

🦋 Notes

- I am doing service and will not be drawing a salary.
- Renting a 4WD vehicle will often be required.
- This is not a 501(c)3. Through the IRS' eyes you would be making a gift. US citizens may gift \$14,000 a year tax free to anyone, with anything above \$14,000 applicable to their lifetime \$5.49 million gift tax exemption. Above that US citizens will pay gift tax. For more information please seek advice from the IRS or a tax professional.
- If there's a surplus it will be returned unless you prefer it to go to purchase sacred sites.
- Donations can be made by check or Paypal. Addresses are at the beginning of page one.

🦋 No Future Funding Needed

Once the first 50 sites are restored Life Chi Feng Shui should flow to the world in a large way. With a low product cost, fairly high price and my passion for world restoration, the proceeds will go toward sacred site restoration and purchase, plus other life positive projects which will move forward easier.

🦋 Having Vision and Courage

This will upend our knowledge of the earth and what is needed. Through history there have been people and ideas which didn't fit in boxes.

- The known world laughed at Columbus for his round world ideas. Rulers of Portugal, France, and England turned him down. Spain's King Ferdinand and Queen Isabella saw he might be right and financed his journey.
- Einstein said that light is bent by gravity. He wasn't taken seriously until Sir Arthur Eddington received funding for sailing expeditions to Africa and Brazil to precisely photograph a solar eclipse, no small feat in 1919. It confirmed Einstein's theory and physics was upended.
- Previous absolutely known fact: ulcers are caused by stress and diet. Drs. Barry Marshall and Robin Warren received ridicule for their bacteria causation theory. Then they proved it and received a Nobel Prize. Now ulcers are thankfully quickly cured with antibiotics.

🦋 Why is this not a 501(c)3 ?

The traditional way to do a project of this scope would be to form a 501(c)3 however IRS regulations wouldn't allow that as it will mostly be an assistant and I doing the work. The IRS in their infinite wisdom would see it as a self-serving organization.

An option suggested by someone familiar with non-profits is going under a 501(c)3's umbrella. There are a good number of potential problems with this including:

- I don't know of a 501(c)3 which would umbrella this.
- They typically want a percentage (10-30% I am told) for their responsibility and work.
- Most are living hand to mouth so they may use some of the funds for their own projects, figuring they can repay them from future income which may not come.
- They may see this as a burden because if the program failed it would be in their record, causing them to over manage and encumber the work.
- They could be unpredictable if management changes.

I need to focus on the task at hand, which is huge. I am an energy worker, get overwhelmed by excessive bureaucracy and too much paperwork, have evaluated the options and feel the independent route is best so I can focus on meridian restoration. Not being an accountant or attorney I am of course open to additional input.

🦋 **Fiscal and progress reports**

While I don't want to be bogged down with paperwork I will submit progress and fiscal reports as you request and a final report upon completion. Audits are welcome.

"When we do the best we can, we never know what miracle is wrought in our life, or in the life of another." Helen Keller

🦋 **Examples of "Primitive" Energy Workers**

Otzi is the name given to a well preserved man who was buried in ice, frozen in a time in the Alps for 5,000 years. He was exposed in 1991 as ice melted and was found by hikers. Otzi has tattoos on his acupuncture meridians, yet acupuncture supposedly wasn't developed for some time, and certainly not in the Alps. Otzi gave us this bit of enlightenment about very aware people we previously thought of as unsophisticated.

🦋 **The Source of These Sacred Sites**

Some are nature's creation such as Yosemite's Half Dome and the amazing formations in Arches National Park. Having studied them, other sites were almost certainly made by our early ancestors who we call Stone Age and primitive. In fact examining the sites shows how sophisticated our ancestors were. They created the sites to enhance earth's chi for future civilization. They are vital to life.

Some rock formations mark celestial events. Below are photos of a petroglyph on Summer Solstice when at noon the sun comes through a slit in rocks (left image), briefly forming an arrowhead (center) in front of the snake. A few minutes later a wolf standing on a rock (part of its neck has fallen out) and a flying shaman appear (right). The different coloration is due to light on the lens in the right photo.

🦋 Looking Ahead

My parents' generation grew up with world wars. My generation grew up with the threat of nuclear annihilation and the current generation has global warming. It would be great to end human caused global threats so future generations can live in peace and sanity. I dream of what that would be like.

"Those who stop dreaming are lost." Aboriginal Wisdom

🦋 Results

I've am driven to make the world better. Some of my work was detailed earlier. My desire has intensified and as I have shifted my emphasis the benefits are reaching more people. I know from years of experience that adjusting chi improves lives, often better and faster than therapy or other methods. Millennia of feng shui experience speak likewise. Meridian restoration will do the planet's feng shui and will have a huge impact on all of humanity including:

- We will have greater caring for each other and the earth
- War will be reduced
- Greed will transform into fairness
- Clearer spirituality will blossom
- We will be a saner species including politics
- Other life positive projects will have more success

"You can't connect the dots looking forward; you can only connect them looking backwards. So you have to trust that the dots will somehow connect in your future. You have to trust in something - your gut, destiny, life, karma, whatever. This approach has never let me down, and it has made all the difference in my life." Steve Jobs

🦋 A Bit About Me

I am an introvert, shun social media and don't want fame. The world's spiritual systems have traditions of doing work quietly. Orthodox Jews believe the world is held up by 10 sacred people. In the old country if you sensed you knew one you were supposed to quietly slip some Rubles under their door at night. There are Yogis, known only to a few, whose path is to meditate for the world in caves in the Himalayas. The few who know of them bring them bags of rice and other supplies, then return home, never telling anyone where they went or why.

The universe empowered me to do this work for humanity and the planet, guided me to teachers and the first sites and showed the location of others. Funding is the one thing lacking. Up till now I had no need to ask for help. I have enjoyed being self-sustaining and doing service in trade for a place to live.

Meridian restoration is best done invisibly. If the sites' locations are discovered they would be at risk of rocks being removed by ill-intentioned people or souvenir seekers.

🦋 My Gratitude to You

Gratitude is a basic part of life. If you help I will be eternally grateful. While traveling doing the work I will be meditating sending everyone who has helped good energy. If you help with \$100,000 or more I will also be meditating on how to thank you in a public way which will be helpful to you when the project is complete, assuming you would like that. I don't know what it would look like. Some things take time to coalesce, but when they do the results can be spectacular. You will deserve the best.

☯ A Meditation

If you'd like to help out immediately, I encourage you to take a minute to meditate sending energy to the earth's meridians. It may be easier to visualize them as light beams going where they need to. Other ways work great too and irreverence is fine... one day while mountain biking I was seeing them healthy and connected while singing Solidarity Forever. This work can be fun!

☯ In Conclusion

I thank you for considering this paradigm changing project. I promise you it will be well worth it. Please contact me with your any questions and of course to help!

In Service,

Wyling Cambrium

Speck of dust in the cosmos

"At age 13 I sailed (from my home in The Netherlands) to England. I didn't think my parents would think this was OK so I didn't tell them. The police had to pick me up and put me in the custody of my father, who put me back on my boat to return home solo. The North Sea is rough so after that I figured I was ready to sail around the world." Laura Dekker

Laura had spent much of her youth sailing and repairing boats. When she was 14-16 she sailed her boat Guppy solo around the world becoming the youngest person ever to do so.

"This is what I want to gift to you all today: If you have a dream and I know that every single person has a dream, even though you might not realize it there is something in you, you really, really, really want. So go for it, don't be afraid. It might be hard, yes, it will be hard. I had to fight along the way. (Not just storms... she went through eight court cases over a year to be able to do her journey with Dutch authorities trying to take her from her father who supported her journey.) But how harder it is, how more rewarding it is to fulfill your dreams."

Laura now lives in New Zealand, has her Captain's license and earns her income making yacht deliveries and giving presentations. She has thought provoking videos such as <http://youtu.be/BA60BScgmzw> . I think every teen and really anyone wanting inspiration should see them. I cried as I watched and thank her and so many others for their inspiration.

I dedicate my work the Laura and so many who deserve a good life on a healthy planet.
